AN NEW ZEALAND

Something That Partial Socialism Has Done.

A GOOD EXAMPLE FOR CANADA

New Zealand Owns Her Railways, and Other Public Utilities.—It is Becoming One of the Most Progressive and Prosperous Little Colonies in the British Empire.

Henry D. Lloyd's latest book, "A Country Without Socialism," shows what the steps toward socialism that New Zealand has taken are accomplished. Mr. Lloyd shows what compulsory arbitration has done, and explains its imperfections because of the partial lack of socialism. He says: "Arbitration does not remove the bottom evil of all in the labor world, and economic inequality of masters and men which makes a free contract impossible because one of the parties is not free; but it certainly adds a humanizing touch to the methods of the struggle, and all civilization is lifted a stage."

But it is because of the socialism that New Zealand has adopted that its system of arbitration has been so successful, because, as William P. Reeve, the author of the compulsory arbitration law, says in the introduction to Lloyd's book, "New Zealand is perhaps the most simple and complete little democracy in the world."

"What compulsory arbitration brought by the socialist spirit has done is thus summed up in 'A Country Without Strikes':"

1. Strikes and lockouts have been stopped.
2. Wages and terms have been fixed so that manufacturers can make their contracts ahead without fear of disturbance.
3. Workmen, too, knowing that their income cannot be cut down nor locked out, can marry, buy land, build homes.
4. Disputes arise continually, new terms are fixed, but industry goes on without interruption.
5. No factory has been closed by the act.
6. The country is more prosperous than ever.
7. The awards of the Arbitration Court fix a standard of living which other courts assist in deciding cases affecting workmen.
8. Awards made by compulsory arbitration are often renewed by a voluntary agreement when they expire.
9. Trades unions are given new rights and are called upon to admit all competent workmen in the trade.
10. Compulsion in the background makes conciliation easier.
11. Compulsory publicity gives the public, the real arbitrator, all the facts of every dispute.
12. Salaried classes, as well as wage-earners, are claiming the benefits of arbitration.
13. Peaceable settlement with their men has been made possible for the majority of the employers who wanted to arbitrate, but were prevented by minorities of their associates.
14. Labor and capital are being organized into trade unions and associations, instead of mobs and monopolists.
15. Trade honesty is promoted by the exposure and prevention of fraud on the public.
16. Humane and law-abiding businessmen seek the protection of the law to save themselves from destruction by the competition of inhumane and law-breaking rivals.
17. The weak and strong are equalized both among the capitalists and the workmen.
18. The victory is given as nearly as possible to the right, instead of to the strong, as in war.
19. The concentration of wealth and power is checked.
20. The distribution of wealth is determined along lines of reason, justice and the greatest need, instead of along lines of the greatest greed.
21. Democracy is strengthened by these equalizations.
22. It furnishes the people their only cheap, speedy and untechnical justice.

DURRANT WAS INNOCENT.

Rev. Mr. Gibson on his dying bed confessed to the murder of Blanche Lamont and Minnie Williams, for which Durrant was legally murdered

as the guilty man. The "Frisco Examiner" took an active part in condemning poor innocent Durrant whose honor is now restored, but too late. The cowardly murderer who speechlessly lay during hang—what a pity he died. There are hundreds of people in this province who always maintained that Durrant was innocent. These Durrant, Dreyfus and other legalized outrages make a man's blood boil. This "circumstantial evidence" hanging is ungodly at any time, but in this case the persons responsible for Durrant's execution should be shamed off the earth.

A. E. WELCH IS A RUSTLER.

A Bright and Useful Means of Placing Easterners in Touch With the Lardeau.

A. E. Welch of the Scottish-Canadian Mining Company, London, Ont., operating the Rob Roy up the north fork, has a clay model in his office window in London, which is attracting a great deal of attention from the penmen. Speaking of the model in a London paper says: "It is especially interesting to Londoners, as so much stock in the local mining companies operating in the Lardeau has been taken up here, and it shows very clearly the locations of the various properties. One can form but a very vague idea of a mountainous region from a written description, but a glance at this model puts one in possession of a much clearer knowledge of this mountainous part of British Columbia than whole books of description can give. It shows the river all converging on one central part, the water being represented by crushed glass, and the ingenious way in which pack horses have to ascend the steep and rugged Salkitric, switching their way back and forth, in order to ascend an otherwise inaccessible mountain. The town of Ferguson is shown, with the trails leading thence up the north fork of the Lardeau, winding in and out among the hills until Circle City is reached, up beyond which the trail runs to the properties of the Scottish-Canadian Mining Company, of this city. The tunnel south is shown, also the ore which has been uncovered, and one can see at a glance the meaning of certain technical terms, which, without this object lesson, would be obscure."

HAS FAITH IN THE LARDEAU.

A Roseland Man's Opinion of the Outlook for This Season.

Boss E. Chesnut of Roseland, who spent all last season prospecting in this district with the result of a few shovels, returned to the camp Thursday last, and says he has never seen a better season before. He says he will be man in here with capital but partly developed properties, the general opinion of the outsiders being that the claim holders to have come of their high horse, having decided to ask a more reasonable figure for their properties. It is conceded on the outside that the Lardeau will have a railway within a year at any rate, and this in itself is guarantee enough for the average "ground floor" speculator. Mr. Chesnut has been in the Klondike and other mineral regions, but he has never seen such surface showings and ore bodies as are exposed in this camp. "Why" said he "the Salkitric will not be lit at all this season. It will be developed. Mr. Chesnut did not mean to speak of his own properties, preferring to prove their worth before making any statements, but needless to say his convictions are backed up by his time and money. What more faith in the country could a man have?"

SCHOOL WILL OPEN AUGUST 13th.

Secretary Shannon has received a reply from the education department at Victoria re the Ferguson public school. Arrangements for the school house have been practically completed, and the necessary blackboards, desks, etc., will be installed in time to open the school on August 13th, after the summer holidays. A school house will not be built at once, but the site will be arranged for and cleared this season, to be ready for abutting grounds and the school next year. A teacher is being provided and Ferguson's public school will soon be a desirable reality.

NECESSARY TRAILS

Connection With the Duncan Slope Should Be Made at Once.

DEVELOPMENT IS RETARDED

The Cooperation of the Two Members, if Successful, Would Greatly Assist in Opening Up a Vast and Rich Mineral Belt, and Be Very Beneficial to This Camp.

Just before the Semlin-Cotton government was thrown down by Lieut.-Governor McInnes the EAGLE suggested that Messrs. Kellie and Green get together and jointly build a trail, on a wagon road grade, from the head of navigation on the Duncan river, to the headwaters of the Lardeau north fork and thence down to join with the present partially constructed trail. The necessity of the trail is obvious to anyone acquainted with the local conditions. If a person could come from either end of the district and go out the opposite way he could see more country and save a lot of time by being able to travel by rail to the Duncan point. R. F. Green, in whom the Slocan people have again placed their confidence by a large majority, was at that time favorable to the proposition, but of course all efforts were frustrated by the abrupt dismissal of the government. But now that this riding's nonentity has been disposed of and Mr. Taylor is the man with whom the people have to deal, the EAGLE feels quite confident that joint action will be taken by these two live members, at the very first session, to connect their ridings by a trunk-trail. The tributary or branch trails, the owners of which properties on both slopes are willing to build themselves, in fact a good many hundreds of dollars have already been expended by mining companies prospecting over that way, in developing and reaching their properties. The trunk trail the government should build and build this season as quickly as possible. The trunk trail connecting the Lardeau south fork country with the Duncan river trunk trail leading up to the headwaters of the north fork is also a much needed work. It too will open up rich mineral belt and give investors more country to see and the choice of two submits to cross. Mr. Taylor's attention has already been drawn to this necessity and he is endeavoring, even before the session, to get a special appropriation so that the work may be begun at once. Property owners can rest assured that our new member will do his utmost to bring the pressing need of trails before the government. Mr. Taylor is already thoroughly familiar with the claims' urgent requirements, and the wisdom of securing a representative with such a knowledge will soon be demonstrated to us all.

DEVELOPMENT UP FISH RIVER.

Camborne is the Centre of a Whirl of Activity.

CAMBORNE, June 25.—Times are lively in the Fish River camp. A lot of work is being done and some good strikes are reported. E. C. Woods, M. E., has about 20 men at work on the Wide West and Black Bear groups and will put another force on the Banner group in a few days. Some work has been done on the Alma group and a large body of ore, 4 ft. wide, is now showing. Mr. Beck has a big force of men at work on the Salkitric group. A trail has been built and cabins put up and a tunnel has just been started. Harry Dodrie is pushing along his tunnel contract on the Pontiac group in good shape and expects to tap the lead this month. The Eoliphe is showing up splendid. She is a shipper from the grass roots. The tunnel on the Camborne is in over 60 ft. and a short cressent will now tap the lead at a good depth. Work has just been started on the Western Star group, which is a very promising property. A number of deals are now under consideration and it is expected that two propositions will be taken up before another work is over.

A great number of prospectors and mine men are now in camp. Pack trains are kept busy and a lively summer is looked for.

RAILWAY TONNAGE

One Being Sacked or Piled On the Dump.

IS AWAITING TRANSPORTATION

Rich Strike on the Maud.—Work on the Nettie L.—Gold Values Increasing in the Cup.—Morning Star to be Surveyed.—Assessment and Development in Full Swing.

Rich Strike on the Maud.—Work on the Nettie L.—Gold Values Increasing in the Cup.—Morning Star to be Surveyed.—Assessment and Development in Full Swing. Rich Strike on the Maud. H. Carter and L. Thompson were down on Sunday from Circle City. They have been doing assessment work on the Sunset group, about a mile above Circle City on the north fork proper. After working on the Anna, the bottom claim of the group, for awhile they decided to prospect further up the mountain. They followed up the lead, which runs right to the summit, to the middle claim in the group, the Maud, and here commenced stripping. The lead they exposed consists of quartz and calcite with a schist formation on each side. It varies from 10 ft. to 20 ft. in width and a few shots in the payrock threw out some exceedingly fine samples, and left a fine showing of mineralized quartz. They left on Monday morning to continue work on this promising property. They will take care enough ore for a test shipment and if financially able stay by it until repaid for their many long day's hard work in this camp.

The Nettie L.

"Things are moving along much as usual on this mineral property, just overlooking the town of Ferguson. Seven men are at work and as soon as the Morning Star comes in more will be put on. A shipment of well sorted highest grade ore is now being made ready. The ore in the ore house, ravedilled over while the snow was here, is being freighted to the Landing by Messrs. Craig & Hillman, but it will not give as good results as what is now being sacked from the new strike, because it was not so carefully sorted. The company's directors hold their annual meeting in Revelstoke on the 11th of July, when the plans for future development will be laid.

silver Cup.

Manager Dillish was up at the Cup on Monday and returned yesterday at his monthly official visit. Twenty men are working still and development is being vigorously prosecuted. The ore is now being sacked which runs 30 cents a pound, or \$600 a ton, the increased value in gold being accountable to a large extent. Blankets are used at times so valuable the ore. The Cup ore is averaging \$100 a ton, but the silver content is lead and \$14 in gold to the ton. It will thus be seen that the gold values are increasing with depth. The Cup can ship just as much ore as they choose this winter. It would only be a matter of increasing the working force.

Blue Jay and Mountain Vine.

These claims are located on the headwaters of McDonald creek, a tributary of the Duncan river and are owned by James Comerford. He says that he has one of the largest surface showings on these claims that he ever saw in the country. The ledge varies from 40 to 60 ft. in width, with a payrock of 20 to 30 ft. in thickness. It is 2000 ft. The remainder of the ledge matter would make a good concentration proposition. Mr. Comerford has built a cabin, but the development work so far consists of two short tunnels and lead stripping, the results of which are very satisfactory. Work will be continued for some time yet.

The Morning Star.

Messrs. Abrahamson Bros., of Trout Lake City intend to have the Morning Star surveyed this season and enough work will be done to crown grant. The Truine and Morning Star are very close together. If not overlapping there is the necessity of determining the full scope of the Morning Star, the prior location.

The Lode Star.

Mr. Captain Connaught, manager, and Messrs. Abernethy, of the Lode Star Mining Company, operating above Duncan City, were in Nelson last week. They stated that the Lode Star is look-

ing particularly well, and that if the railroad facilities were at hand the mine could ship 100 tons per day.

The Monitor.

John Parisian was down from the Monitor last Thursday, returning the same day. He says they are busy driving along side the lead, which will progress. Conservation to time. Development is proving as favorable as was expected up to this date.

W. J. LEDINGHAM'S OPINION.

"The arch enemy of progress is on top, but a thousand times better there, in open daylight, than in on the side. The end is not yet and I hope that Mr. Taylor will look into the matter and hold himself aloof from a government dominated by a corporation and monetary influence, and free to enter the first party who (independent from personality) will advance measures of progress. Conservation to time. Development is proving as favorable as was expected up to this date. The arch enemy of progress is on top, but a thousand times better there, in open daylight, than in on the side. THE BEST KIND OF PRAYER.

A poor orthodox one day... I am on watch No. 2, picket of the 29th Brigade. My head is encased in a Blacklava helmet given to me by a fond aunt...

A NIGHT ON OUTPOSTS.

When the British Army Lies Down to Sleep. I am on watch No. 2, picket of the 29th Brigade. My head is encased in a Blacklava helmet given to me by a fond aunt...

machine will soon be heard upon the grass—so green, so English green. It cannot be more exactly as it was. Are there not many beautiful prayers at the bedside, and aching, sleepless heads?

General Freighters

Didn't Recognize the Truck. The new motorman was strong and willing, but he hadn't been in a city for long...

A BLACK IDEA.

A return of the negro to slavery is the remedy proposed by the Rev. H. Frank for race trouble in the South. "Hold up," says the Lewiston Journal, for over four thousand years...

such an invitation were to-day extended to the negroes of the South I venture to say hundreds of them would gratefully accept. When a man is busy, and trying to make a modest living, nothing irritates him more than to have a bearded woman rush in and take up his time in trying to get a subscription for the establishment of missions that are not needed.

SMOKE CIGARS

And at all times insist on the box bearing THE BLUE LABEL. It helps manufacturers to see the force of paying fair and honest wages.

Wonderful new mines

Now being developed by strong, practical companies. Mining Companies' Headoffices. Are being located in Ferguson. Stores and Country are being enlarged. Properties are changing hands. Capitalists are appearing on the scene.

Smelter men are on the Ground. Railway Construction has practically begun, and the entire district is coming rapidly to the front.

Come straight to FERGUSON

The Rossland-Nelson of the Lardeau. For further information, write or see—W. N. BRAYTON, HENRY FLOYD.

THE LOCAL FIELD

The reaction of the Boundary district boom has set in. Assayer S. Shannon is keeping his "blower" at full blast these days.

Thos. Taylor, M. P. P., returned to the camp from Victoria on Saturday.

L. DiJabjein, manager of the Silver Cup, arrived from Revelstoke on Monday.

The provincial legislature will not meet on July 3 as intended. July 19 is the date now set.

D. McLennan, of the Windsor hotel, Trout Lake City, returned from Revelstoke on Saturday.

Messrs. A. and D. Ferguson went out to Revelstoke last week. Andy returned on Monday.

A number of Fergusonites visited Trout Lake on Sunday. The lake is rising a little higher for comfort.

Rev. S. J. Thompson of Revelstoke will probably hold services here and at Trout Lake City on Sunday next.

Dozens of loaded pack horses are leaving the mining centre of the Lardeau almost daily for north and south fork points.

Printers in Roseland have now an eight-hour day in vogue, with no piece work. Roseland is an example of what unity can accomplish.

There are still situations open in Ferguson for female help. Girls, don't all come at once. Wages run from \$15 to \$30 a month, with board.

According to "wholesalers' shipments" reported in the Nelson Tribune this town is mostly supplied by Nelson's wholesale merchants.

S. A. Sutherland, of the firm of McKinnon & Sutherland, general merchants, left for a short business trip to Revelstoke this morning.

"I go for all sharing in the privileges of the government who assist in bearing its burdens, by no means excluding women."—Abraham Lincoln.

D. L. Clink will commence sawing lumber at Trout Lake in a week or two. The water in the lake is rather high as yet, but will likely go down in a few days.

The Eagle has a splendid assortment of paper stock on hand and every requirement for turning out first class job printing of every nature. Orders by mail promptly attended to.

The Rossland Miner still criticizes the Eagle's mining news every week unmercifully. The Nelson Eagle also manages to do the same occasionally. The News-Advertiser might also take a tumble.

Next week the intentions of the C. P. R. as to the Lardeau line will probably be known. A party of C. P. R. magnates are due here in a few days. One at least, of the English directors is with the party.

Allan Chisholm and his road gang are making good headway on the road between here and Trout Lake and doing a good job. The Eagle trusts that the funds will hold out until the work is fully completed.

The Central East Kootenay country is coming to the front this season. Shipments are now being made. They are also waiting for a railway, but they have the Columbia to fall back on for a few months in the summer.

Capt. Ida Galt of Revelstoke held a farewell meeting in Ferguson's hall last evening and will hold another in Trout Lake this evening. The Captain leaves for Skagway in a few days to continue the Salvation Army work there. She has made many friends in this camp by her recent visits.

Mrs. D. L. Clink has received an acknowledgment from the Montreal Star for \$13.00, the amount collected by Little Walter and Gretchen Clink for the 10-cent patriotic fund. When the Trout Lake and Thompson's Landing Mission House funds are acknowledged by headquarters, the district will have made a good showing as a contributor.

Ferguson will join with Trout Lake in Monday's celebration. The Revelstoke City Band will be in attendance and as good a program as could be expected has been arranged for. The prices are not very large, but outsiders will have to wait until a railway arrives on the scene. Then the ore will fly and a day of celebration will be quite different.

"The peanut trust should be roasted; the flour trust affixed to the bottom; the sugar trust smoked out; the plug trust chewed up; the iron trust hammered out thin; the twine trust twisted; the furniture trust carved in twain; the metal trust honed hot; the woolen trust melted; the berry trust picked clean; the paper trust ground into pulp; the lamp trust sufficed out; the lumber trust nailed; the bicycle trust pounded; the male trust buried; the type trust ped, and the pie trust ate up."

SCREAMLETS.

Canada should own the C. P. R.

British Columbia elections may be a very interesting affair, but for real success, unretained, shirt-sleeve jollification, wait for the great presidential election over the way. Its red hot even now.

If the people of Manitoba would assume the control and manufacture of liquor themselves and sell at the cost of production they would accomplish the ends they desire. Prohibition does not prohibit. Take away the profit and the incentive for running a booze joint will soon disappear.

The people of Canada must pay for still another blunder of the Laurier government. The claim for damages sustained by Messrs. Mackenzie & Mann in connection with their Yukon railway scheme, against the federal government, is justice, by Hon. David Mills, Minister of Pledge, at \$333,000, which will have to be paid.

If British Columbia Conservatives want to lead the right thing and demonstrate to the electors their sincerity in their "government ownership of railways" plank they will see that the new government, when organized, which can not be formed without their support, is pledged to practice what it has preached. That female immigration policy might also be set in motion.

The Dominion census will be taken early in the new year and the general elections will follow. Another session will likely be held. The Liberals will do well to make the best of their time and the Conservatives will also have to do their best. Sir Charles Tupper and build a more progressive platform than heretofore. Hugh John Macdonald has set the Conservatives of Canada an example.

The Minister of Mines in his annual report suggests that the law be passed compelling assayers to mark on each certificate of assay exactly from whence he obtained the sample on which the assay was made, presumably whether of the surface or at a certain depth, as well the other information. The idea is certainly a good one, and would make the document more reliable from a purchaser's point of view.

The electors of Canada now have something to ponder that neither Sir Wilfrid Laurier nor Sir Charles Tupper are trying to give us legislation for the good of the masses. Both of them seem to be owned body and soul by the C. P. R. The resolution of objection in the House on the 21st to take the C. P. R. lands after February next was defeated, only six holding for and 99 against. Laurier and Tupper hold that parliament should not be called on to interpret its own acts and that it was a matter for the courts.

As will be noticed in our advertising columns the Imperial bank has increased the surface of its real fund. No wonder. They have the dead immortal cink on every community in which they exist. Like other institutions of this like the government should own and control them. Money destroyed, burned or loaned at a profit, under the present system, benefits a few persons who think they are a little better than the average cuss. But if these profits went into the government treasury what a calamity it would be indeed. "What fools we mortals be."

Whether the railway comes this year or not any person who wants to get into this camp on the ground floor should be here now. Properties and real estate which could now be bought at a very reasonable figure will be worth probably twenty times as much a year hence. It is never advisable to wait until people are rushing into a new camp. The railway will be here possibly this season and certainly not later than next. So that for a profitable investment, and the accomplishment of enough development, work on mineral claims to be in a position to ship ore when the railway arrives, a person should be here NOW.

"One of the noblest works of God is the man who pays the printer."
