

PL

LARDEAU THE EAGLE

VOL. III. NO. 50. FERGUSON, BRITISH COLUMBIA, JANUARY 23, 1902. \$2.00 A YEAR.

1901 ORE OUTPUT

An Advance Report Furnished by the Department of Mines.

AN INCREASE OF 25 PER CENT.

Mines Department Awakening— Might be Induced to Tackle a Government Refinery.

1902 WILL SURPASS THEM ALL

Truly there has been a change of policy in the department of mines of this province. Following close upon the bulletin concerning the placer grounds of Horsely creek in the Cariboo, comes an up-to-date estimate of the amount and value of the mineral products of British Columbia for 1901. The total ore output for 1898, 1899 and 1900 appears on the title page of this issue. The statements for 1901 as given approximately by Provincial Mineralogist Robertson is as follows:

Minerals and Customary Measure.	Quality.	Value.
Gold, placer, ounces.....	42,294	\$ 893,500
Gold, lode, ".....	1,000	2,000,000
Silver, ".....	4,865,718	2,634,000
Copper, pounds.....	30,739,000	1,018,000
Other metals.....	60,639,000	1,070,641
Coal, tons, 2,240 lbs.....	1,421,210	4,571,688
Other materials.....	124,790	678,800
Total.....		\$20,718,501

Of the above values the Cariboo district (estimated) produced \$470,000; the "Clashan" district, \$320,000; East Kootenay, \$2,850,289; West Kootenay, the banner of them all, \$1,362,189; Lillooet, \$56,900; Yale, \$4,751,458; and the Coast-Idaho, \$4,902,665, or \$20,718,501 for 1901, as against \$16,344,751 for the year 1900, an appreciable increase when the many obstacles in the way have been considered.

In submitting this statement to the acting minister of mines, Hon. D. M. Eberth, C. M., Mr. Robertson says: "This estimate is based upon the actual returns of a number of mines, and for those mines from which returns have not as yet been received the output is based upon their approximate known tonnage for the past year, together with the assays of the ores from the same mines for the previous year."

"You will note that these are not given as final statistics for the year, which can only be obtained after all returns are in and checked very carefully. These will be included in the annual report of the department, which cannot be out for about two months yet."

"I had your figure on a railway that wait for the final statistics, as I believe the prompt publication of even an approximate official estimate makes so good a showing will be of benefit to the province, and is generally desired by investors in our mines."

"I think you will find this estimate conservative and very approximate, quite sufficiently so to show the progress which has been made in the mining industry during the past year."

"In calculating the values of the products the usual course has been followed, and the average price for the year in the New York metal market has been used as a basis." For silver 96 per cent, and for lead 90 per cent, of such market price has been taken. "Taxes and other charges have not been deducted."

"Longer speaking, the increase made in 1901 over 1900 is 25 per cent, on gross value of output of the province. This will be a very agreeable surprise to many, as the circulation of reports giving a contrary impression has caused a very dependent view to be taken of the progress of the mining industry during 1901, which does not seem to be warranted by the facts."

"There is an appreciable drop in the placer gold production, owing to the sudden melting of the snow last spring causing freshets and leaving a shortage of water during the latter part of the season."

"The tonnage of ore mined from the

lode mines in the past year is about 871,832 tons, equal to an increase of 317,036 over the year 1900, a little more than 57 per cent.

"There has been an increase in the output of all the metals with the exception of lead, the low price obtainable in this province for lead ores having discouraged this class of mining, except where accompanied with good silver values."

"The gross value of the copper output has increased 206 per cent over 1900, while lode gold has increased 36 per cent, and silver 14 per cent."

Department of Mines Awakening. Possibly the fact that this province has no miner of mines at present may have something to do with the insertion of the following advertisement in the Engineering and Mining Journal:

"British Columbia, the mineral province of Canada.—British Columbia has produced, to date, \$22,584,442 of placer gold, \$12,812,860 of lode gold, \$12,638,448 of silver, \$7,619,626 of lead, \$4,362,383 of copper, and \$49,140,917 of coal and coke."

"The mineral production for 1900 was \$16,344,751. Lode mining has only been in progress for about ten years, and not 20 per cent of the mineral land has been even prospectured; 300,000 square miles of unworked mineral-bearing land are open for prospecting."

The mining laws of this province are more liberal and the fees lower than any province in the Dominion, or that

INJURIOUS ERROR

Made by E. C. Correspondent in Engineering and Mining Journal.

MUST SURELY BE MISINFORMED

Reads More Like a Report of 1898 Than 1902—Two Years of Progress Overlooked.

CAN'T OVERLOOK US THIS YEAR

The EAGLE will not see six bits to a pinch of smelter smoke that Wm. M. Brewer, the Engineering and Mining Journal's British Columbia correspondent, has pretentively turned his optics to this district, or even met and talked to a man who has during the past year. And his latest profession in the special export item will certainly bear out contentions. For instance, there is one of the few gems:

"Talk of railway connection for both the Lardeau and Trout Lake to mining divisions has been freely indulged in, and some surveys made, but apparently the railway company is waiting to see the mine owners are waiting for the construction of the railway, and an influx of capital to purchase a before

Lardeau District the Next Klondike.

The year 1901 again showed an advance in the production of gold in almost all the parts of the world, although the South African mines are still restricted to a very limited output. The search for gold has continued everywhere and has met with a considerable degree of success, although no such sensational discoveries as those of the Klondike rewarded the prospectors.—E. & M. J.

Sufferers Should be Recompensed.

At last the sleepless citizens of Ferguson have a precedent, or rather an alternative for being disturbed each night by a band of worthless howling curs. The Victoria Colonist reports: "A citizen whose dog disturbed the slumbers of the neighbors by howling, was fined \$5. He was given until January 31 to pay." Let the good work extend to the Lardeau.

The Real Article.

A wise mining promoter forecasts all possible objections by first thoroughly acquainting himself with the merits of the proposition and fortifying himself impregably against all possible attack. Knowing thoroughly its merits and believing in the triumph of right he is undismayed by opposition and usually makes the greatest winning in the end.

The amount of gold coin in actual circulation in the world is estimated by the Bank of England officials to be about \$65 tons.

PRODUCTION OF BRITISH COLUMBIA MINES.

Below will be found a table of the mineral production of British Columbia for the years 1898, 1899 and 1900. This table is an effective answer to the croakers who try to belittle the mineral resources of B. C.:

AMOUNT AND VALUE OF MINERAL PRODUCTS FOR 1898, 1899 AND 1900.

Customary Measure.	1898.		1899.		1900.	
	Quantity.	Value.	Quantity.	Value.	Quantity.	Value.
Gold, placer.....	Ounces..... 32,167	\$ 645,846	67,245	\$1,244,900	63,235	\$1,278,724
Gold, lode.....	1,000	2,000,000	2,000,000	2,000,000	2,000,000	2,000,000
Silver.....	4,865,718	2,634,000	2,634,000	1,667,708	3,356,175	2,309,200
Copper.....	30,739,000	1,018,000	1,018,000	1,351,658	3,977,000	1,018,000
Lead.....	1,000	2,000,000	2,000,000	578,870	63,548,221	2,028,887
Other metals.....	60,639,000	1,070,641	1,070,641	2,884,073	1,430,000	4,718,238
Coal, tons, 2,240 lbs.....	1,421,210	4,571,688	1,421,210	171,255	60,142	427,745
Other materials.....	124,790	678,800	124,790	1,000,000	1,000,000	231,740
Total.....		\$10,906,851		\$12,939,131		\$16,844,751

Production for 1890, \$2,608,668; for 1899, \$12,939,131; for 1900, \$16,344,751.

any colony of the British empire. Mineral locations are granted to discoverers for nominal fees.

Absolute titles are obtained by developing such properties, the security of which is guaranteed by crown grants. Full information, together with mining reports and maps, may be obtained by addressing:

HON. MINISTER OF MINES, Victoria, B. C., or WM. FLEET ROBERTSON, Provincial Mineralogist, Victoria, B. C."

American's Anticipation, but Canadians? It would seem certainly looks good to us from a business standpoint, and there is every reason to look for a large copper output. The present price of copper need not worry us, for it is at its lowest point now, and for a short temporary period at that. The influences that have caused it are rapidly being changed, and almost any bright morning will awake to find that copper has risen above 15 cents, to remain permanently there. The business forces demand it, and it would have been there all along had it not been for a few shortsighted interests who, figuratively speaking, killed the goose that laid the golden egg. The pocketbooks of the Michigan stockholders are doing the work of education necessary to bring the management to its senses, and there is a howl going up that cannot be long silenced.—Western Mining World.

Gold Production of the World.

In 1900 the gold production of the world reached a total of \$256,000,000, says the Engineering and Mining Journal. In 1901 this was undoubtedly exceeded, although the full amount of the increase cannot yet be stated with any approach of accuracy.

many of them attempt to develop to any extent."

It may probably be news for Mr. Brewer to learn that railway construction has been going on steadily on this line since last summer, and that trains are even now being operated as far as the steel is laid.

Had the EAGLE a Marconi battery Mr. Brewer would be advised of the Lardeau's progressive and extensive development during the year 1901, proof of which is afforded in the construction, now well under way, of a 100-ton steel smelter plant, by the Lardeau Smelting and Refining Co.

Here is another brilliant effort of Mr. Brewer's:

"Northwest Kootenay District.—From the Lardeau portion of this district have come excellent reports as to progress, but from the other mining divisions Revelstoke, Illecillewaet and Trout Lake the reports have been vague and unsatisfactory."

And in the next breath, speaking of our ore output, he says:

"The bulk of this has come from the Silver Cup, credited with an output of about \$180,000, the Nettie L. with \$146,000, and the Trifone with \$82,000."

And yet the "reports as to progress" from Trout Lake division "have been very vague and unsatisfactory," notwithstanding that all the ore output Mr. Brewer speaks of is from the self-same Trout Lake division.

The EAGLE would urgently advise Mr. Brewer to either visit this camp, buy the way map of the Lardeau—for sale at this office at \$1—or quit writing about something with which he is not familiar—the Lardeau and Trout Lake mining divisions.

If the report of the minister of mines is responsible for such errors as made by Mr. Brewer—which is doubtful—the ordinary industry is supplied by a live man the better.

The Mineral Show.

This will be the event for the 14th February. The company is hard at work practicing how best to use their vocal organs, and set those banjoes ringing. The EAGLE assures the public it will be the best investment of four bits ever offered in the Lardeau in the musical line, while those who love the dance will have a grand ball to look forward to when the storm of jokes, and songs, and music of the best is over.

Let the People Own Them Both.

It would seem preferable for the miners to build and operate their own smelters, and refineries and to make their own sales if they are to continue to do business, and that this will be done seems sure if the miners continue to retain and operate their mines. Outside the absorbing of the mines by the smelter people, this is the only solution.—Mjnl. Jg.

Heating Machinery.

Fergusonites were greeted with a pleasant scene on Saturday evening last, when S. Dancy's four-horse freighting team lugged up Victoria avenue loaded heavily with machinery, boiler, etc., for the new smelter. It looked good to Lardeauites who have long looked forward to the era which is now dawning.

Vulcan Furnaces a Success.

One of the Vulcan furnaces in operation in north Mexico proves more than satisfactory. The EAGLE was shown a letter the other day from the company to Mr. Vernon saying they were producing matte of copper, gold, lead and silver 66 per cent pure, at one operation. Wonderful indeed!

PUBLIC MEETING

Hold by Fergusonites on Monday Evening to Discuss

GOVERNMENT APPROPRIATIONS

Increased Demands For Public Works Come With Growth of the District.

HOSPITAL QUESTION DISCUSSED

On Monday evening last a public meeting was held at the Miners' Union hall for the purpose of discussing the requirements of the Ferguson district in the matter of trails, wagon roads, and other objects of a cognate character.

The fact of increased activity in mining prospects, the establishment of the smelter, and the advance made by the C. P. R. into the county induced a considerable amount of public interest. Amongst those present were R. F. Pettipiece, chairman; James Lade, James Otto, Vincent Lade, Andrew Ferguson, A. C. Cummins, J. P. Joseph Kirkpatrick, A. J. Gordon, S. Shannon, B. A. Al. Chism, David Moran, John Smith, George B. Babo, Robert Gann, John Atkinson, J. Q. McKittrick, William Glenn, William Shannon, Napoleon Em, Henry Russell, etc., etc.

Some seventeen resolutions were put and carried, dealing with the existing and prospective roads and trails, those of the principal moment being the proposed new wagon from Ten-Mile to the edge of the Trifone basin which will cost about \$5,000; the repair of the road from Baty's to Ten-Mile; and the mode of opening up the trails leading into Circle City, thus affecting an improvement most badly required between that point and Ferguson. The trail up Walker creek to the Great Northern main line was considered one of the essentials, if the properties in that section are to be properly developed.

The estimates in most cases were high, to say the least, and after reasonable discussion it was decided to submit the general body of propositions to "Thos. Taylor, our representative, should business permit, if his coming here in the near future. It" be cannot do so, a further public meeting will be convened, probably next Monday evening, and the entire question again considered.

Meantime Joseph Ryan, who acted as secretary at the meeting, will see the various gentlemen who put forward the resolutions, and consider with them in what way they should be modified or increased.

The question of securing government aid for the hospital was referred to a standing committee consisting of Messrs. Jase Lade, A. J. Gordon and S. Shannon, to promote a petition in respect to this most important matter and report progress to a meeting to be held on a future date.

Black Warrior Group.

Very satisfactory results have been obtained from the recent developments on the Black Warrior.

As is well known here this property has the best surface showing of ore in the camp, the outcrop indicating a chute of clean ore averaging two feet in thickness and about thirty feet in length.

Last week this chute was broken into from the new tunnel at a depth of fifty feet and practically the same conditions as to size of chute and nature of ore prevail here as at the surface.

The position of the chute in the ledge and its dip is the same being now known as S. Shannon thinks the developments of this week will very likely disclose the whereabouts of the ore body in the lower tunnel. It would now seem that this property may be added to our list of shippers for the coming season.

Advertising Rates: Display ads, \$1.00 per column inch per month. Legal ads, 12 cents per column inch per month. Reading notices, 5 cents per line each week. Sixty day level notice, \$10; sixty days, \$7.50; thirty days, \$5. No ads accepted for less than these rates.

Subscription Rates: By mail or carrier, \$2.00 per annum; \$1.00 for six months. To foreign addresses \$2.50. All payments in advance.

Job Printing: The Eagle job department is best equipped and staffed with experienced men and is prepared to execute all kinds of printing at lowest prices.

HOW INVESTORS ARE WORKED

The guileless (?) investor living in the east is frequently considered fair game for the graffer. That the latter sometimes happens to be "working his graft" in connection with mining is unfortunate in so far as it discredits in the minds of the uninformed the legitimacy of mining as a business. But every good thing is counterfeited, even money, and the good business man will endeavor to continue the use of good money and reject the bad, in spite of this fact, says one of our writers.

Some of the ear marks of the latter, should be studied but only incidentally since a thorough knowledge of the genuine article is the only safeguard. So in a mining investment, if a promoter starts a stock at a few cents and runs it up to twenty cents simply by advertising and increase in price of minerals without having done anything to add to its real value, it is safe to let such an operator alone.

This is particularly true if after spending several thousand dollars of the company's money without making a shipper of the mine, he starts in to promote another company along the same lines and has the nerve to refer to his former success in stock selling as an inducement to bite at his present scheme.

A property may be ever so good and yet if it is so managed that the secretary and a few of the official board are the ones to reap any benefit it is safe to conclude that the stockholders' money is not being judiciously invested. It may also be concluded that the sale of stock is the chief aim of the management, rather than the making of a producing mine. When a man advertises stock at a given price and says the figure will be advanced on a certain date in the future because of a strike in the mine or because it will be shipping in sixty days, when he knows that neither of these statements is a real factor in the advance, he is simply getting money by false pretenses and operating a confidence game rather than a mine. He is proceeding on the theory that it is easier to work a sucker than to work a mine.

In a general way it is very safe to let alone the proposition that offers you too much for your money. It usually includes returns in the shape of a gold (?) brick.

A fair business risk and a bona fide proposition calling for capital for development can generally be accepted with safety in mining as well as any other industrial enterprise. The percentage of profit in a legitimate mining enterprise, however, is much larger than in any other business.

What is the use of crying peace and good will when there is no peace nor good will? Everybody knows that the monopolies are eating up the property of all the people, that they are levying tribute that would cause a revolution against any king who should attempt to do the same thing. You do not like the monopolies, and you know it. Nobody does unless he is an owner in some of them, and even then he knows it is wrong, says the Appeal. What are you going to do about it? Are you going to sit still until they have everything in their hands and can withhold every necessity of life and force you to starve or break the law? Are you willing to become industrial slaves? Are you lost to every desire to be free from their tribute? Are you willing to forever listen to the lies of politicians who have been running things for years, and have permitted monopolies to grow and

prosper? Do you not know that men who are robbing you by taxing your food and necessities will bribe to get politicians to lie to you? Do you not also know that the trusts will not quit skinning you until you force them to, by electing men who have a program that will take out of their hands the power to tax you? Why longer shut your eyes and feel that it will come out all right whether you act or not? Wrong is never righted, except that men go at it to right it. Men who do injury to their fellows for gain will continue to injure them as long as they are permitted. If the trusts would destroy themselves, do you not know that they would be at it, and that you could begin to see such effects? Wake up!

The old established firm of Bourne Bros., Revelstoke, have made an assignment for the benefit of their creditors: It seems hard luck for men, after having worked diligently for nearly twenty years, to have to lay down, but nothing else can be expected under our present corrupt money system. Only a few weeks ago two three of the oldest firms in Victoria went down, and there are others to follow very soon. The B. C. Trade Budget, of Vancouver, is familiar with the benefit of co-operation in this age, and has advised small concerns to amalgamate, reduce expenses and prices, and thus protect themselves from certain collapse. In other words, the small merchant must get ready for socialism as readily as the proletariat, for experience is proving that they have no lead-pipe ginch on the future. The present day lessons may seem to be clear ones, but probably it's the only way a lot of the men with "capitalist minds" can be taught to think. How much easier, better and safer it would be were we shareholders in the people's trust. The sheriff, the lawyer, the private banker, and other sharks who prey upon and live off the producer would then, too, be employed at some useful work for society.

A man with a common million or two is not of much account now-a-days. Consider the mine owners, for instance, says the Paysleader. Lead prices have been knocked in side out by a trust big enough to buy every silver-lead mine in the province and still have a healthy stack left. Mines like the Slocan Star, which has made half a million, or the Payne, which has made a million and a half, or the North Star, which has several millions in sight, or the St. Eugene, which could supply the whole of Canada with lead and have enough left to tear a side off the China trade, are all prone to the trust. Their owners may have considered themselves heavy-weights, but they are white chips in the big international game now being played. They will be reduced to a wage-scale basis and allowed to make just whatever it suits the trust to allow them. Then not only the miners who do the actual physical work of pounding the drill, but the men who own the land and the machinery of production will be working for the monopoly, which owns the machinery of distribution. This is the inevitable outcome of the present system. There is one avenue of escape—government ownership and operation of the machinery of distribution.

The Hon. Jos. H. Hutchinson, ex-lieutenant-governor of Idaho, and now superintendent of the Trade Dollar mine, says: "Last year Idaho produced \$18,300,000 worth of gold, silver, copper and lead; that is about \$175 for every person in the state, or \$600 for the average family."

\$18,300,000! But who received the means of production, of course, less a small percentage paid to the men who produced the wealth. And who were the owners; the state? Or not the owners live in New York and Paris, and never even saw a mine. That's queer. Now why couldn't the state "own" mines, smelters, refineries and so on, and do the same as the capitalists, hire the brains and labor to operate their industries? Oh, you see if the state did that, such family would have actually had \$600 to their credit, which would be good for the state's user, "owner" of the means of production.

Tariff protection created millionaires in the United States, whose combined efforts in the industrial world are to-day crushing foreign

manufacturers out of existence. In other words the captains of industry of the United States—backed by capitalists of all countries—are nationalizing socialism. It is now the duty of the producers to organize. Let us further socialize our schools, and municipalities, then the Province and, as a matter of course the Dominion, if not then commercially annexed and socialized by Uncle Sam. The other fellows, the trusts, are internationalizing the movement. And we must meet them far on the way as we can. The time to begin is now. Socialism is coming more rapidly than we are preparing for it.

The civic labor ticket, except one alderman and two school trustees, was turned down in Rossland on Thursday last. Owing to the mine owners' strike few union men are now in Rossland, hence such a result was made possible. In fact, the Eagle is reliably informed, Barney Macdonald practically blackmailed the Rosslanders by a threat to close the mines were the labor ticket elected. May the kind God of heaven help a city in such a deplorable position. John S. Clute was elected mayor over J. P. McKichan by 62 of a majority.

The result of the West York Dominion bye-election only goes to show that it was by sheer force of his personality rather than his creed or politics that the late Hon. N. Clarke Wallace held the constituency with such a sweeping Conservative victory each election. Last week Campbell, a liberal, was elected by 156 of a majority, over a son of the time-honored Orange leader.

The Eagles has consented to place a column of its space at the disposal of the members of the Socialist Party of B. C. until such times as the party secure a paper of their own, which will be established at the coast some time this year. Send along your "ideas," reports of meetings, and progress of the movement in your locality.

The only way to get rid of the smaller article in the present is by absorbing it in the people's trust. To look for relief by competition is hopeless.

WATER RIGHT NOTICE.

WATER CLAUSES CONSOLIDATION, ACT '97.

THIRTY days from date I Charles W. McCrosnan of Mines Contract No. 31888, an owner of land, intend to apply to the Gold Commissioner for the right to close the sluice, ditch, pipe or otherwise fifty meters of water from a water creek, by the west of the North Fork of the Lardreau River, in Trout Lake Mining Division of British Columbia.

The point of diversion of said water will be about 1,200 feet from where said creek falls into the North Fork of the Lardreau River. Said water will be returned into the Lardreau River about 1,000 feet from the mouth of said Walker.

The difference in altitude between the point of diversion and exit will be 20 feet or thereabouts.

The purpose for which said water is required are general, mechanical and industrial purposes, such as smelting (and all purposes incidental thereto), refining, crushing and treating of gold, silver, lead, copper and other minerals at the smelter premises now being constructed, and for the raising of a sufficient quantity of water to operate a sufficient fire protection equipment for said plant, premises and works, and for domestic and sanitary purposes.

Dated at Ferguson, B. C., 8th day of January, 1902.

CHARLES W. MCCROSAN.

APPLICATION FOR LAND.

NOTICE IS HEREBY GIVEN that sixty days after date I intend to claim the title of the Chief Commissioner of Lands and Works for consolidation of the following parcels of land, consisting of 120 acres more or less, in the Trout Lake Mining Division of British Columbia, and described as follows: Kootenay district and described as follows: Commencing at a post placed about 80 feet north from the wagon road along the south fork of Lardreau creek, approximately half way between the mouth of the creek and the west end of the chain east; thence 90 chains south; thence 60 chains west; thence 60 chains north to point of commencement.

Dated at Ferguson, B. C., this 27th day of November, 1901.

JOSEPH MURRAY.

MINERAL ACT, 1896 (Form F).

CERTIFICATE OF IMPROVEMENT.

NOTICE.

NETTIE L. and A. J. mineral claims situate in the Trout Lake Mining Division of West Kootenay District, British Columbia, between the North and South forks of Lardreau creek.

TAKE NOTICE that I, A. F. Cummins, as agent for the claimants, the Trustees of Ferguson, B. C., Pros. Miner's Certificate No. 2480, intend thirty days from the date hereof, to apply to the Mining Registrar at Revelstoke, B. C., for a Certificate of Improvement for the purpose of obtaining a Crown of the above claim.

And further take notice that action, under section 37, must be commenced before the expiration of the above term of days.

Dated this 7th day of November, 1901.

A. F. CUMMINS, P. L. S.

MINERAL ACT, 1896 (Form F).

CERTIFICATE OF IMPROVEMENT.

SILVER CROWN mineral claim, situate in the Lardreau Mining Division of West Kootenay District, British Columbia, on the west side of a tributary of Boyd creek.

TAKE NOTICE that I, Hector Polier, P. M. C. No. 26078, acting as agent for myself and George man who, "owner" of the means of production, intend to apply to the Mining Registrar for a Certificate of Improvement for the purpose of obtaining a Crown of the above claim.

And further take notice that action, under section 37, must be commenced before the expiration of the above term of days.

Dated this 7th day of November, 1901.

HECTOR POLIER.

If you are building or contemplate building we will be pleased to quote you estimates on anything made in our

Sash and Door Factory

And we feel confident that we can give you satisfaction in every particular. Write: Sawyer Bros., Revelstoke, B. C.

For the next month I intend to make

Mail Order Watch Repairing

A Special Feature.

Having a first class mechanic at the head of this department, Mr. R. N. Doyle, Lardreautes need not hesitate in sending their watches to me for repair. All work guaranteed at prices consistent with the best market. I have the finest stock of Jewellery, Watches, Clocks, etc., in North Kootenay. Call or write at once. Will mail you a box to send watches to me for repair upon application.

Kamloops: J. J. Lipson, Sec. Silverton: Walter Smith, Sec. New Denver: James W. Keenan, Sec. Hazelton: James McDonald, Sec. Keston: John Roberts, box 27, Sec. Nanaimo: Alfred B. Baker, Sec. Trail: J. A. McLeod, Sec. Greenwood: G. W. Tom, Sec. Phoenix: G. W. Rogers, Sec. Ymir: R. Stewart, Sec.

A declaration of the principles and aims of the Socialist Party as drafted by the executive, will appear in these columns at some future date.

British Columbia needs statement at Victoria and Ottawa who will rescue the lead industry from rapacious railway monopolies and smaller trusts. They will come genuine property-paystreak.

The Independent Political Labor Party of Victoria has been re-organized. A committee was appointed to draft constitution and by-laws which are to be submitted for ratification at a future meeting.

Snobocracy is loose over the world with money unlimited. Money from labor, knows no bounds. Its mind is too profane and its skin too thick to see even the inadequacy of robbing a nation to adorn a parlor.

If any further evidence of the paucity and existence of the capitalist union miners was wanted it is now afforded by their lenient attitude towards Barney McDonald's organ, the Miner. The miner's union in Canada. That its plant has not been blown to atoms, and the literary staff borshevik is a tribute to the good sense of the miners.

Los Angeles Weekly Herald: "The objection to the Chinese on the part of the people who are familiar with Chinese character is broad and fundamental. It may be summed up by saying that the Chinese are morally, socially, religiously and politically unfit to live in the United States."
Granted. But they look good to Victorians, for they have killed the capitalist class commercially.

Few artists are wealthy, yet there is often a fortune in a picture. The other day we read of J. P. Morgan purchasing a painting for half a million francs. The picture, painted by the Scottish artist, John Dalrymple, depicting a stonemason amidst squalid surroundings in Belfast, on the day when all people were fasting and rejoicing over the birth of the Saviour. Dalrymple's works were exhibited at the Royal Academy, and he took three first prizes for designs at the Paris Exhibition. Some day a work of his may sell for what would have kept him in comfort for many years.

A Roosevelt Remark.

There is one excellent remark in President Roosevelt's first annual message. He says: "American wage-workers work with their heads as well as with their hands. Moreover they take a keen pride in what they are doing so that independent of the reward, they wish to turn out a perfect job."

It is worth while to wade through the whole wearisome document in order to get those two sentences. For think how they corroborate the socialist argument. Think how they confuse that time-honored objection that, if the lash of hunger were not felt, no one would be willing to work. It is good to be able to quote such words from the most strenuous of republican presidents in reply to that old but ever new plea of the defenders of competition and wage slavery.—New York Worker.

The Dog and the Tail.

A Fable by F. H. Richardson.
There was once a beautiful, large dog, and his name was Labor.
This dog had a scrubby little runt of a tail, and the name of the tail was Capital.

And the dog wagged the tail.
But in the course of the tail, whose name was capital, conceived a thought, and it spoke unto the dog and said:

"Look here, why is it that you wag me? That's all wrong. I ought to wag you. Look at my importance! Why every time you bark my hair bristles up and scares the everlasting stuff out of the object of your wrath. And of what use are you except to sustain and carry me, the important and dignified end of the company? Just look where you would be as if I should be lopped off—why, sir, you would be a bob-tailed dog all your life! Indeed, you must wag me no more! I, as the center of this institution, will have safely steered you through all your troubles, will attend to any wagging there is to be done in the future."
The dog, being dull of mind, at once saw that the tail was perfectly right, or else God would not have caused it to speak so, and he at once acquiesced.

And ever since the dog has been wagging the dog and banging him against the trees and bumping him against the fence posts, and dragging him through the barbed wire and lambeating him around among the woods and thicket and creek's banks, mopping up the earth with him generally.
But some of these days the dog will also conceive an idea, and if he has brains enough to perform such an action—and the dog will again wag the tail, and in his new found joy he may wag the tail so hard that there won't be any tail left at all.

Mines and Minerals.

There is only one best mining journal. It has a larger circulation than any two other American mining journals because it is the best. It is the largest, best illustrated, handiest mining journal in the world. It contains a mining paper, a magazine, and a directory price \$2.00 per year. Send for free sample copy. Address MINES AND MINERALS, Section 1, P. O. Box 4, Denver, Colo., North Hill, Denver, Colo.

CIRCLE CITY is absolutely surrounded by mining properties now under development.

CIRCLE CITY affords splendid water power which will be utilized next season for concentrating purposes.

Circle City will Present Business Opportunities this Spring

Send for the new Map just out (free), and full particulars, to the General Agt.,

**G. B. BATHO
FERGUSON, B. C.**

If ever there was a time in the history of the town of

FERGUSON

to buy lots that time is now

The railway is being pushed to completion and soon the C. P. R. will accept through freight for Trout Lake. Trains are now being operated on the new road as far as the steel is laid.

The McCrossan smelter is now under construction right on the townsite of Ferguson.

Many mining properties surrounding Ferguson are rapidly reaching the shipping stage, while the shippers speak for themselves. Not only is Ferguson the commercial, banking, smelting and pay roll center, but here is where the most prominent Lardeau mining men have their interests and headquarters. The best lot locations are being picked up by shrewd investors.

There is Big Money in

FERGUSON REALTY

If Secured at Present Prices

Business Lots are still on the market at \$150 upwards. Residential Lots at \$75 upwards.

Meeting of Executive.

VANCOUVER, B. C., Jan. 15.—The executive committee of the B. C. Socialist Party met here on the 15th. They decided in view of the fact that so few of the locals have sent in reports of vote on platform and constitution, to extend the time till Feb. 1st. As there is urgent need of getting into permanent shape all locals desiring to vote on these propositions must do so in returns by that date. Correspondence was received from following locals: Victoria, Nanaimo, Revelstoke, Greenwood, Nelson, Ladang, and G. Weston, Wrigley, Toronto; J. Cameron, organizer, and Miss Merrill of Nelson.

The secretary was instructed to prepare and had published, early in February, a complete statement of receipts and expenditures; write J. Cameron testifying their high appreciation of his work as organizer; also to write to local at Nanaimo and try and clear up an apparent misunderstanding.
Present: T. Mathews, J. Dodd and E. Burns.
Ernest Burns, Secretary, 130 Powell St.

Ernest Burns, executive secretary, Vancouver, in a letter to the Socialist, Seattle, says:

"My socialism is of a more elastic quality than that of some ultra-orthodox comrades, who have reduced socialism from a philosophy to a creed, and regard the slightest questioning of their tenets and dogmas as heresy of the most outrageous type. We have now entered upon an era when the principles of socialism will have to be applied to our conditions, and it is right before us and will not commence—as so many of the comrades imagine—after some industrial catastrophe has occurred in which the economic fabric of capitalism will fall to pieces, leaving the ground free and clear for socialism. On the contrary, we have to grow into socialism from present conditions, just as feudalism grew into commercialism, clearing away the rubbish of obsolete socialism on the one hand and laying the foundations for the temple of industrial democracy wherever we can find chance to work. This concurrent process of development and decay takes place in all organic life, not excepting the institutions of society itself. Constructive practical work is of far more service than revolutionary air-fanning or unintelligent repetition of stock phrases or revolutionary jargon."

Socialism demands the public ownership of all the means of production and distribution.

Charters for the socialist leagues of B. C. are now in the printer's hands, and will be ready for delivery by Feb. 15th.

Secretaries of all locals are requested to send short accounts of their meetings and doings, for publication in this column.

Any comrade in a community desiring to form a B. C. local of the Socialist Party should apply at once to the provincial secretary.

Organizer Cameron has completed the present organizing arrangements for a new organizer are now being made by the executive.

"The fight of the humblest human soul to the resources and liberty needed for living a complete and unceasing life is infinitely more sacred than the whole fabric and machinery of civilization."

Any contributions you wish to make to the organization and propaganda fund, should be sent to the executive secretary, and will be acknowledged in this column. Your orders for literature will also be promptly filled upon application.

To keep in touch with the socialist movement of B. C. you should be a reader of the EAGLE. Clubs of twenty will be accepted at 50 cents a year, the unexpired term, if any, to be completed by the new socialist paper when established at the Coast.

The executive committee of the Socialist Party of B. C. has extended the time of voting on their submitted platform and constitution to Feb. 1st. All locals are requested to send the return to the secretary, Ernest Burns, 130 Powell St., Vancouver, by that date.

What an appalling amount of rent and interest there must be paid to foreign landlords by lessees in such cities as Vancouver and Victoria. One-half of the amount—if paid to the city itself, which should own the same—would pay all expenses and have lots left for beautifying their natural opportunities. Let the foreign lessees be shaken off by Canadians.
